## LEGAL INDUSTRY EXPERTISE

From our executive team down, our people have a robust background in the legal industry; many of us have worked at law firms for many years. Our history working with and alongside legal professionals is the basis for our understanding of their workflow challenges.

## WE ALREADY REVOLUTIONIZED COST RECOVERY

When our competitors were becoming apathetic and indifferentiable, we were revolutionizing the cost recovery business with our patented Embedded solutions. We provided a needed shot of Red Bull to an industry limited to Coke and Pepsi.

## WE ARE NOW REVOLUTIONIZING SCANNING & ROUTING

Only nQueue's InfoRoute document scanning software solution allows law firms to capture documents using any of four different modules (known as "OnRamps"). Only InfoRoute formats, OCRs and routes scanned documents to any number of destinations (known as "OffRamps"), including leading document management systems, all in less than a second per page.
